Big data architectures

I start with Aquinas's concept of meaning, or—using a transliteration of medieval terminology to distinguish it from contemporary conceptions—signification. Classification is the process of identifying the category or class label of the new observation to which it belongs. In 2017, a new R-package BivRegBLS was released.

Semantics Study of Meaning

Simmons considers the Open Pair towards the end of Chapter 7, and notes that: A and B are both true when reflectively evaluated.

Predication (philosophy)

For the qualification 'with respect to his teeth' takes something away from the concept of what is said to be white, since nobody can be said to be white, except who is totally white, or with respect to most or the principal parts.

Predication and reference in specificational sentences

Et quia forma facit esse in actu, ideo forma dicitur esse actus.

Prediction Interval, the wider sister of Confidence Interval

On the other hand, admitting such concepts and forms as the immediate vs. We shall discuss such 'existential' sentences presently.
