The intracratonic branch of the Damara Orogen in South West Africa II. Discussion of relationships with the Pan

All elderly men and women would wear a !gūb, which is a skirt-like loin-cloth or traditional skirt for men and women. The !khaikhōb is the hide of a medium-sized antelope most preferably a !hauib a or a dôas, !nâus that is worn to cover breast and the abdomen during pregnancy.

The intracratonic branch of the Damara Orogen in South West Africa II. Discussion of relationships with the Pan

He ensured the annual renewal of nature being the cycle of the seasons and supplied game animals to the !garob : veld and the Damaran.

The !Hûadaman live along the length of the !Hûab Huab River. This clan originally lived in the Khomas Hochland and were moved to !Guidilgams Omaruru thus were called !Aobellaen People living on the periphery i. Such an interpretation would make it possible to regard the intracratonic branch as a failed arm of a hypothetical triple junction situated to the west of the present-day coast.

Turbidites in the Damara Orogen

Green and blue identify the different sub-groups.

Turbidites in the Damara Orogen

Les séries pré-Damara au sud du géosynclinal de Damara ont été subdivisées en Formation de Marienhof et en Groupe de Dordabis au centre du Sud-Ouest africain, et en Groupe de Kgwebe qui se trouve en Botswana. The break-up of Pangaea since the Jurassic and Cretaceous, primarily through opening of the Central Atlantic, Indian, and South Atlantic oceans, in combination with the complicated subduction history to the north, gradually shaped the African continent.

The Join of the Coastal and Intracontinental Branches of the Damara Orogen, Namibia, South West Africa

Une caractéristique du géosynclinal de Damara dans la région septentrionale du Sud-Ouest africain réside dans la transition progressive de sédiments relativement peu déformés des faciès miogéosynclinaux aux faciès eugéosynclinaux métamorphisés, Une image grossière reflétant cet arc qui sépare les deux faciès se trouve le long de la chaîne adventive du géosynclinal de Damara et concorde très précisément avec la limite septentrionale du craton du Kalahari. Their traditional clothing colors are green, white, and blue.
