## **Divergent fold overturning and regional tectonics, southern Slave Province, Northwest Territories**

The lakes at pipe locations are generally deeper than those formed by just glacial action.

## **Reconstruction of burial history of eroded Mesozoic strata using kimberlite shale xenoliths, volcanoclastic and crater facies, Northwest Territories, Canada**

Inuit communities began living around military stations for security and access to resources.

## **QGRG : publications**

Special thanks to Marek Janowicz for many hours of laboratory work. History Before Europeans arrived and began to engage in trade with the Aboriginal population of what is now known as the NWT, the area was populated by small groups of Aboriginal peoples such as Inuit and Dene. In terms of product portfolio expansion, there are two potential triggers.

## **Public Registry**

Four new sites were found on a proposed approach route to a road construction camp on the original route south of Back Lake.

## **Diamond mine in Canada's Northwest Territories wants to dump waste into its pits**

The visit involved tours of the open pit and underground workings, the processing and recovery plant, and the facility in Yellowknife where diamonds are cleaned and sorted for distribution figure 3. The Month of Arctic Onions and Western Birch: Arctic Botany 2014. Through radiometric age-dating methods on sulfide mineral inclusions chiefly the long-lived radioactive decay of rhenium to osmium in otherwise gem-quality diamonds, some of the oldest diamonds ever formed 3.

## **Public Registry**

Veritas Reconnaissance Elisa Hart, NWT Archaeologists Permit 2000-905 Elisa Hart of the Inuvialuit Land Administration accompanied a seismic reconnaissance crew working for Veritas DGC Land of Calgary, to locate known heritage sites on or near proposed developments related to two seismic programs. Hardisty confirmed that no cabins or other sensitive areas would be affected, and no new archaeological or traditional sites were found during the inspection.

## **WMS Service: GDR Web Map Service: GDR\_E**

Due to the initiation of construction for the Misery mine southeast of Ekati, five previously recorded sites located in the vicinity were visited to reassess their status. At each sieve level, the diamonds are transferred into separate containers and packaged for shipment. Conversely, epilithon abundance was low, perhaps because of high invertebrate numbers.
