## Rocky Mountain Elk

The lake and the meadows are also a renowned wildlife location; elk and moose are frequently spotted, bears less often. Deer are browsing animals eating such things as willow, aspen, antelope bitterbrush, and even pine needles. The island was again such a beauty place on earth, no wonder of its reputation.

## Rocky Mountain National Park

The USFWS is represented in Idaho by recovery coordinator Carter Niemeyer, and enforcement agents in the Boise USFWS field office. Another period of uplift and erosion during the Tertiary period raised the Rockies to their present height and removed significant amounts of sedimentary deposits and revealing the much older basement rocks.
