## Nanoparticles that look and act like cells

The potential role of Piezo1 in RBC physiology is most clearly demonstrated by many gain-of-function mutations in Piezo1 that have been identified in patients with the RBC disease xerocytosis, also called dehydrated hereditary stomatocytosis DHS ; ; . Hematology and microscopy Blood was isolated from mice from either the retro-orbital plexus of mice anesthetized with isoflurane or from the heart of euthanized mice. A23187 and TRAM-34 were both purchased from Tocris Bristol, United Kingdom and were dissolved in DMSO.

## Biochemistry of Blood

These antibodies remain in the blood so that agglutination can occur if the 2nd transfusion with Rh + blood is given due to the previously produced anti-D-antibodies. This is in complete agreement with the
