A Neurotypical's Guide to Speaking to Someone with Autism

Hank sees his friend Terrell as he is climbing the stairs to get to his seat at the baseball stadium.

Communicating With Adults Who Have Autism Spectrum Disorder

This might include using gestures or pulling someone to what they want. Depression, anxiety and obsessive-compulsive disorder are all known to be more common among autistic people than in the general population, but PTSD had largely been overlooked.

10 Nurse Tips for Dealing with Autistic Patients (Part 1)

The researchers also found some unexpected trends: The association between PTSD symptoms and autism traits is, for as yet unknown reasons, stronger in men than in women, even though typical women are two to three times more likely to develop PTSD than are typical men; that gender bias might eventually inform treatments. They will also like the good attention being given to them so they will trust you more. They may also have difficulty processing what they hear, and not understand what was said to them.

5 Ways to Encourage Communication with a Non Verbal Child Diagnosed with Autism

The other concept is speaking to a child with like any other child. There is also the lack of the ASD person of making eye contact.

21 Autism Speech Therapy Strategies that Improve Communication

Together with , an autism expert at Bar-Ilan, and others, Horesh has begun investigating where PTSD and autism converge. AAC Interventions for Autism: A Research Summary.

Functional Communication Training

Lofthouse N, Hendren R, Hurt E, Arnold LE, Butter E. Some people get frustrated and defensive when they encounter difficulty in understanding or making themselves understood in conversation — especially with high-functioning autistic people such as yourself — because without obvious

perhaps visual? It also encourages your child to copy you and take turns.
