Ontario's Long

The Liberals brought in their Fair Hydro Plan in 2017 to address a public outcry over soaring hydro rates, particularly in rural areas. We believe that our success is a reflection of our clients' success.

Ontario energy quarterly: electricity in Q1 2020

Even though Ontario is scheduled for a general election in spring 2018, the policy direction taken by the current government will be difficult, although not impossible, for a successive government to unwind.

Find programs to reduce your electricity bill

A focus on consumers The LTEP emphasizes consumer education, protection and choice in the energy sector. Even as the Ontario economy has moved beyond the 2008 recession, demand has remained flat. Here are a few things to consider.

Ontario energy quarterly: electricity in Q1 2020

The Ontario Electricity Rebate will appear on your hydro bill as a single line item, replacing the former 8% rebate and rate reduction previously provided by Global Adjustment Refinancing under the Fair Hydro Plan.

electricity conservation

Keep in mind that the Tier threshold for small business customers is 750 kWh all year round. These periods are referred to as off-peak, mid-peak and on-peak and are shown in the figure below.

Ontario pulls the plug on electricity

Generally speaking, the less energy a large industrial consumer uses during peak hours, the more these consumers reduce their impact on the provincial power system as well as their electricity costs. While intended to provide immediate relief to consumers affected by increases in electricity rates, this refinancing by way of a debt or variance account funding mechanism supported by the government-owned Ontario Power Generation, the details of which are yet to be fully set out will extend the duration and ultimate total cost of the long-term financial obligations that are determining electricity rates as of today.
