## 12 CFR Appendix Supplement I to Part 205

By means of the relation between period and length of the simple pendulum, derived in the same year, he found for this distance the value of fifteen Rhenish feet, seven and one-half inches, which is very close to the correct value. Paragraph 2 c 1 ii 1.

## General encyclopedia

Child abuse accounts for the leading cause of death in children, usually at the hands of one or both parents.

## air pollution

Example: She loves me, and there are so many ways that she has shown it. Galileo's battle for free inquiry, independent of the interference of authority, was, in his own time, doomed to defeat. These tendencies may be activated by the occupants of strategic roles within the major institutional spheres as they attempt to broaden the scope and develop the potentialities of their spheres.

## Movies: Documentation

Japanese quail *Coturnix Coturnix Japonica* have to call much louder than usual when they live in a noisy environment. At the outset, the only materials seemingly satisfactory for sustaining an explosive chain reaction were either U-235 derived from U-238 or P-239 an isotope of the yet unsynthesized element plutonium.

## Encyclopedia of Insects

Under the category of laws known as coverture, a married woman's identity merged with that of her husband.

## **Fallacies**

In this book Galileo spoke out decisively for the Copernican system for the first time in print. A third system had been worked out by the Danish astronomer in 1588.
