

Smiles, Level 5 (Smiles, Level 5)

Harcourt - ALL SMILES Grade 1 Level 5 (Harcourt Brace Signatures Reading Program) (1999 edition)

Designing a Level 1 Evaluation Instrument	
<p>Briefly describe the instructional program that you are evaluating:</p> <p>_____ _____ _____</p>	<p>Our school district is developing a new program, each teacher is responsible for evaluating students in their classroom at least once per week. Effectively incorporating technology into instruction will be part of teacher evaluation. Teachers will attend a 1.5 hr Promethean interactive technology training session to learn about the latest Promethean and its application and how to make them in the classroom setting. This training session is the first of 5 continuing education credits (CEC) available for teachers willing to acquire increased technological proficiency in the classroom. It is our hope that providing CEC will increase teacher motivation and ultimately student achievement.</p>
<p>Rating Question and Response Scale:</p> <p>Please rate your perception of the PROMETHEAN interactive whiteboard using the following key:</p> <p>1 = Strongly Disagree 2 = Disagree 3 = Neutral 4 = Agree 5 = Strongly Agree</p>	<p>Describe the ABCD variables or other responses:</p> <p>_____ _____ _____</p>
<p>1. This training was presented in an interesting manner.</p> <p>2. I considered the information that was presented.</p> <p>3. Clear participation and interaction were encouraged.</p> <p>4. The use of hands-on activities was essential to learning.</p> <p>5. The discussion sessions after the demonstration helped reinforce the material.</p> <p>6. This training will improve the way I teach in my classroom.</p> <p>7. The Promethean interactive whiteboard has value in the classroom.</p> <p>8. This staff development training session will have an impact on student learning.</p> <p>9. This staff development training session is important in helping me gain advanced technological skills for assessment.</p> <p>10. Adequate time was provided for questions and discussion.</p> <p>11. Before actually using the PROMETHEAN interactive whiteboard, attending this training</p>	<p>Attention - This is the most important question. The whiteboard is a new technology. If a student were to use the training, they are more likely to be ready to learn (state of readiness). The use of hands-on activities and discussion provide a higher level of cognitive thinking and give the learner the opportunity to interact with the new material. As long as the training materials, participants are more likely to give their attention because they are actively engaged and doing the learning.</p> <p>Relevance - The learner feels the training has meaning and will transfer the new skills. Many "hands-on" activities suggest that the learner was able to effectively transfer the most of the information which was presented and effectively use the classroom.</p> <p>Confidence and Satisfaction - As always, the effectiveness of a training session is measured by the ability to transfer learning to on-the-job. Therefore, teachers who indicate that content was useful about teacher performance during training are going</p>

The Logic of Notpron: Levels 1

After 1987, traders realized that extreme events could happen and markets have a significant skew. Penny always blushes when she is nervous, embarrassed, or hot, and right now she is all three.

Smile by Raina Telgemeier

Able to adapt to pain psychologically and with medication or devices such as cushions.

Miles&Smiles Program Content

Once you take care of the problem, pain usually goes away. If looking for greater implied volatility, choose an option that is further ITM or OTM.

Bloggy: notpr0n

Page Citation: Journal: Disabled World. However, sometimes pain goes on for weeks, months or even years.
