## First Global Topographic Map of Mercury Released

.

## Gold mining in Alaska

.

## The Geology of Alaska

Placer gold was discovered in 1907, but activity was sporadic and poorly recorded. According to the agency, aeromagnetic surveys could prove useful in vectoring in on porphyry deposits in the region. The mine opened in 1996 and in 2015 produced 401,553 troy ounces 27,535.
