Darwin and Wallace's joint paper on evolution

PAGES Additional facts by Leroy, Spalding, Lowne, and Dixon on the Nest-Building and other Instincts of Birds 108—112 Dr. She died when Charles was only 8 years old.

Human Origins: Alfred Russel Wallace and Charles Darwin

The Danaidae and the Acrædæ of the Old World tropics form in fact one great group with the Heliconidæ.

Wallace and Darwin

.

Alfred Wallace

If, on the other hand, any particular butterfly of an eatable group acquired the disagreeable taste of the Heliconias while it retained the characteristic form and colouring of its own group, this would be really of no use to it whatever; for the birds would go on catching it among its eatable allies compared with which it would rarely occur, it would be wounded and disabled, even if rejected, and its increase would thus be as effectually checked as if it were devoured.

Wallace's and Darwin's natural selection theories

Wallace expressed no resentment at this - in fact he was Darwin's greatest fan. Two essays written in 1842 and 1844 pp. He wrote an essay titled On Population.

Alfred Russel Wallace

He found that hairy caterpillars were uniformly rejected; five distinct species were quite unnoticed by all his birds, and were allowed to crawl about

the aviary for days with impunity.
