The FSC Controlled Wood system undergoes major change

Sawmill gross margins are reported for key world markets each quarter in the 56-page publication, the Wood Resource Quarterly WRQ. Impact of SBA's Proposal To Appraise Any Small Business Set Aside Timber Sale to the Nearest Small Business Mill To assess the impact of changing the appraisal point for the small business set-aside sales to the nearest small business mill, SBA analyzed the appraisal data provided by FS and timber sales data from TSS. A brand represents a promise that the product will satisfy customer needs.

Podcast episode devoted to Swedish Wood's Karlstad Market Conference

Knotty versatile blanks could be used for packaging or fences. But, says Cool, regardless of the advances in technology, there will still be a need for sawmillers who know their equipment, and mills, inside out.

A new approach

The low recovery of better grade veneers that are more acceptable for face veneers C-grade and better , could make the production of a standard commercial mix of structural products challenging when only using a resource of this quality.

February 2004

A market orientation means more supplier responsibility, more emphasis on customer support, more concerns of customer need satisfaction, and more flexibility. More variability in the SR was produced within the white cypress pine logs.

Comparison of processing methods for small

As can be seen from the table, the inclusion of the stewardship sawtimber in calculation would result in an increase to the recomputed small market

share in eight 12 market areas, a decrease in eleven 14 market areas, and no change in the remaining 113 market areas.
