The Four Great Inventions of Ancient China

A large amount of text, image, audio, and video information has been collected and processed, especially authentic records of project elements, technical process, feature, folk taboo, tools and physical assets of movable-type printing technique, providing original basis for the recovery of the technique when it is necessary.

Printing

Thus the invention of paper by Ts'ai Lun or Tsai-lung c. The development of the in Europe may have been influenced by various sporadic reports of movable type technology brought back to Europe by returning business people and missionaries to China.

Printing Press

The mash was strained in a mesh frame and then dried. The work ethic is truly impressive. It took him twelve years to finish printing the 1076 volumes.

Movable type

In addition, they have participated in the drafting of the report and provided specific materials and suggestions. Johannes Gutenberg begins printing the Bible, which he finishes in 1456. While the impression was being made from the one form, the type was being put in place on the other.
