### Oil spill

Meet the dual-use requirements of drilling and repair We spend significant amounts on removing and replacing offshore equipment. The act covers persons and entities involved in the manufacture, testing, distribution, administration, and use of covered countermeasures. Prince William Sound Provisions Title VI.

### Case Details > Oil Spill by Mizushima's Tank Damage

C A complex may develop a single response plan with a set of core elements for all regulating agencies and separate sections for the non-transportation-related and transportation-related components, as described in. Oil spills and oil dumping events have been impacting sea birds since at least the 1920s and was understood to be a global problem in the 1930s.

### Risk assessment of petroleum product transportation by road: A framework for regulatory improvement

With the exception of certain pipelines, the environmental management of onshore pipelines and the onshore hydrocarbon industry generally is primarily overseen by the Department for Environment, Food and Rural Affairs, the Environment Agency in England , Natural Resources Wales in Wales , the Scottish Environmental Protection Agency in Scotland and local authorities. Oil spills at sea are generally much more damaging than those on land, since they can spread for hundreds of nautical miles in a thin which can cover beaches with a thin coating of oil. A section on discharge detection by personnel and a discussion of automated discharge detection, if applicable, shall be included for both regular operations and after hours operations.

### 40 CFR Appendix F to Part 112

A dispersant is either a non-surface active or a added to a , usually a , to improve the separation of and to prevent or. Although the Model Clauses applying to licence awards in English and Scottish areas of the UKCS will be substantially the same, the jurisdictional distinction is particularly important as different arbitration provisions will apply to a licence, depending on whether it is situated in the English or Scottish area of the UKCS please see question 13. While production of crude oil and natural gas liquids from the UKCS has been in decline since 1999, the rate of decline slowed in 2014 due to the opening of new fields.
