Edith Watson — Wikipédia

With his mop of curly hair, signature khaki vest, and a penchant for flying low over the savannah in his Piper Super Cub bush plane, Murray Watson had already made a name for himself in Africa, tracking herds of wildebeest in Tanzania and hippos in Zambia. For a long list of rebels including millions of women, people of color, and LGBTQIA people.

Biography of Edith Watson

The graduation ceremonies revealed the extent to which she had won respect: Dr. Fulhame greatly admired Lavoisier's work, she could not agree with either the Phlogistians or the Antiphlogistians: her experimental results, and her scientific logic, demonstrated that both views were flawed. In 1896 Watson travelled to Canada and spent the next 35 years traveling across the country photographing rural life.
