### Are we better a decade later in the accuracy of survival prediction by palliative radiation oncologists?

All authors helped with the interpretation of the data, read and approved the final manuscript.

### Validation of a Predictive Model for Survival in Metastatic Cancer Patients Attending an Outpatient Palliative Radiotherapy Clinic

The successful progression of the initial bone metastases fractionation question into a treatment guideline, a quality measure, and a recommendation to all radiation oncologists and patients in the Choosing Wisely campaign suggests that further palliative radiotherapy initiatives will be well received.

### Validation of a Predictive Model for Survival in Metastatic Cancer Patients Attending an Outpatient Palliative Radiotherapy Clinic

Further research should aim to increase the accuracy of CPS in order to improve patient outcomes. All medical records, treatment details, and information on date of death were available in the hospital's electronic patient record EPR system.

### Palliative radiotherapy: past, present and future—where do we go from here?

Median age was 64 years range 38 to 78 years and there were 27 male 61% and 17 39% female patients.
