

Utilization of greenhouse gases

American Chemical Society - Which Industry Emits the Most Greenhouse Gas?

Description: -

- Multicultural education.
- Cultural relations
- Psychology, Social
- Methane -- Congresses
- Carbon dioxide -- Congresses
- Greenhouse gases -- Congresses
- Utilization of greenhouse gases
- ACS symposium series -- 852
- Utilization of greenhouse gases
- Notes: Includes bibliographical references and indexes
- This edition was published in 2003

Filesize: 29.56 MB

5 Notorious Greenhouse Gases

Another effect involves changes in , such as and.

The Top Ten Greenhouse Gases

Public and private sectors have also been investing in such as solar, water, and wind power. Although the concept that land use change has an impact on carbon stocks is universal, it is a concern primarily in tropical ecosystems.

Which Industry Emits the Most Greenhouse Gas?

Today's CO₂ levels are almost doubled, but the average temperature is only 1°C warmer. Nitrous oxide comes from and fossil fuel burning. Another way humans release CO₂ into the atmosphere is by cutting down forests, because trees contain large amounts of carbon.

Greenhouse gas emissions

EPA's Inventory of Greenhouse Gas Emissions and Sinks EPA develops an annual report called the Inventory of U.S. Greenhouse Gas Emissions and Sinks. Many human societies depend on predictable rain patterns in order to grow specific crops for food, clothing, and trade.
