Once in, the giant drill we were in, burrowed down in to the egg white.

Earth Was Waiting Spent And Restless

As the plate descends it starts to melt due to the friction caused by the movement between the plates. However, since the magma can escape easily at the surface the volcano does not erupt with much force. Active Volcanoes A volcano which has erupted recently Dormant Volcanoes A volcano which has erupted in the last 2000 years, but not recently is dormant or asleep.
