Today, serious, quality research is challenged by the confounding proliferation of information and misinformation readily accessible online. Unequalled in its combination of authoritative scholarship and comprehensive coverage, International Encyclopedia of Education, Third Edition succeeds two highly successful previous editions 1985, 1994 in aiming to encapsulate research in this vibrant field for the twenty-first century reader. Whether an action is morally justified or permissible will depend on a number of factors.

While the lives of many, perhaps most, non-humans in the wild are consumed with struggle for survival, aggression and battle, there are some non-humans whose lives are characterized by expressions of joy, playfulness, and a great deal of sex Woods 2010. The ancient geographer 1st century AD reported that the important sacred grove and meeting-place of the Celts of Asia Minor, Drunemeton, was filled with oaks. Rather than identifying intrinsic or innate properties that non-humans share with humans, some feminists have argued instead that we ought to understand moral status in relational terms given that moral recognition is invariably a social practice.
