Repast

The average areola is in diameter, but some are much smaller and some are.

Repast

An unusually short lifespan might indicate that your Reast ancestors lived in harsh conditions.

Repast

These cards will not be sorted. You may notice changes in your breast size, shape, and color over time.

QSL Bureau

Dakota Territory had the highest population of Reast families in 1880. SASE WIA members will still receive their cards in the manner in which they receive them now.
