Attitudes of Student Teachers towards the use of English as Language of Instruction for Science and Mathematics in the Philippines

These results have great implications in the present implementation of the bilingual policy as science and mathematics teachers have determined through their shared experiences that the use of English only in their classrooms has not been effective and productive in the long term. They suggest, by and large, that bilingualism attained through different conditions of exposure will not be different in its fundamental cognitive organization.

What the Research Says About Immersion

When the novel situation imposes new constraints, the learner is required to capitalize on more domain general cognitive and linguistic abilities. My mom especially gets anxious and embarrassed over her wonky German, and the way personnel treat me vs her is pretty apparent as well.

Response: Everything You Wanted to Know About Dual Immersion But Were Afraid to Ask (Opinion)

They seem to consider English as necessary since terms in science and mathematics are all in English. Journal of Speech, Language, and Hearing Research, 1, 39. However, it is useful to distinguish a narrative from a story and from other related terms such as discourse and frames.

'Requires proofing by a native speaker'

Conversely, English- language natives may be a dominant group in their society, at least on a linguistic spectrum. Immersion and other innovations in U.
