

Synthesis of information on ecotoxicity of pulp mill effluents in the Peace, Athabasca and Slave River basins

The Study - Read Download A Synthesis Of Information On Ecotoxicity Of Pulp Mill Effluents In The Peace Athabasca And Slave River Basins PDF

Description: -

-

Effluent quality -- Alberta, Northern.

Wood-pulp industry -- Waste disposal -- Environmental aspects --

Alberta, Northern. synthesis of information on ecotoxicity of pulp mill effluents in the Peace, Athabasca and Slave River basins

-

Northern River Basins Study project report -- no. 78 synthesis of information on ecotoxicity of pulp mill effluents in the Peace,

Athabasca and Slave River basins

Notes: Includes bibliographical references.

This edition was published in 1997

Chemicals simulated included 2,3,7,8-tetrachloro dibenzofuran, dehydroabietic acid, and phenanthrene. The findings are used to assess the state of aquatic ecosystem health and to develop scientific and management recommendations for the northern river basins. Reviews the characteristics of the northern river basins and their peoples, the organisation of the Study, and major findings in the areas of environmental overview, use of aquatic resources, traditional knowledge, flow regulation, fish distribution and habitat, nutrients, dissolved oxygen, contaminants, drinking water, ecosystem health, modelling, human health, and cumulative effects.
