### Free Essay: FACTS AND FICTION IN PSYCHOLOGY

There were no differences in the reaction times to pictures associated with condition, perspective, or perspective taking preference.

#### ‘Based on a true story’: the fine line between fact and fiction

Racial Recognition — Studies reveal that people recognize and interpret the emotional facial expressions of those in their own race faster than those who are a different race. Latrophobia — Fear of doctors or going to the doctors 18. .

#### Fact or Fiction?

Point the Finger — People are more likely to blame other people rather than the situation when something bad happens. Kelly can be seen as a psychologist going in two directions, or standing on two different feet, perhaps moving from one towards the other.

#### Fact or Fiction?

Here, however, I want to focus on a Kellian perspective even though the claims being made have much wider relevance.

#### Frontiers

Despite evidence that readers are more likely to engage in 1st person perspective imagery when reading 1st person stories, we cannot replicate the perspective effects for the picture recognition task ;. Deconstruction: Theory and Practice London: Methuen. The data obtained from these participants was analyzed separately.

#### Fact or Fiction?

. Colour Productivity — People are often more productive in blue rooms 64.

### Fact and Fiction in Psychology by Hans Jürgen Eysenck
