### Sebastian Cabot (explorer)

November 2017 Believing that King Ferdinand II of Aragon was giving more financial support to exploration than the English, Cabot moved to Spain from England in 1512. After losing 18 men in an ambush he returned to San Salvador, meeting on the way Diego García, leader of a new Spanish expedition to the Plata. This claim is less contentious in light of a well-documented business connection between Columbus and Vespucci.

He retained the post of pilot-major of Spain until 1547.

### Bristol

Both Venice and Bristol are attributed to his birthplaces. The historian James Williamson reviewed the evidence for various given dates in the 1480s and concluded that Sebastian was born not later than 1484, the son of, a Venetian citizen credited with or origins by birth, and of Mattea Caboto, also Venetian. Because of this, Sebastian received much less attention in the twentieth century.

### The Discovery Of The Main Land By The Cabots (1497) THE ACCOUNT GIVEN BY JOHN A. DOYLE

She appears to have gone back to that plan by 2002. Some later descriptions suggest that he may have reached as far as the entrance of Hudson Bay. Result: intellectual disappointment and decreasing confidence in the reliability of the text.

### **Sebastian Cabot (explorer)**

Even though he sailed on his famous voyages for England, John Cabot was Italian. In the spring of 1529, he returned upriver to Espíritu Santo, which he discovered had been overwhelmed and burnt by the Indians during his absence. So scanty are the records of Cabot's two expeditions, that altho we know the geographical extent of his discoveries, yet it is impossible to assign to each voyage its proper share.

### **Biography**

He recovered the and returned to San Salvador.
