

# Geographical education - expanding horizons in a shrinking world

Scottish Association of Geography Teachers in association with the Commission on Geographic Education - Education Systems Around The World: A Comparison

**FIGURE 1**  
**A framework for building historical expertise**

Grade band	Primary goals at this developmental stage
4-6	Development of a broad chronological framework of significant and enduring events and figures leading to the development of a deeper understanding of the context in which these events and figures took place. The development of history, ideally, begins with a general sense of major events of world history and an introduction to historical thinking practices.
6-7	Deeper examination of engaging and controversial events of history as a means through which to apply historical thinking practices to examine debates, and to develop skills of argumentation within the domain of history while continuing to develop a broad chronological framework of enduring events and figures with additional deep dives to put historical thinking into practice. Ideally, learners would respond to the challenges and importance of the past in their own lives as they increase their deep knowledge of subject areas.
8-10	Deeper examination and application of historical practices, including making judgments about the capacity to study events from the past (or micro-level events) in the context of macro-level (or world) events with an emphasis on progression in students' competence with regard to historical thinking practices and concepts. Ideally, learners would expand their broad knowledge base, enhancing their capacity to think critically within history while continuing to use historical thinking practices.
11-12	A critical examination and application of historical practices, including development and defense of historical arguments about relevant and significant historical events that demand critical application of historical thinking practices and concepts. Ideally, learners would have opportunities for creative expression through development of historical inquiries of their own, demonstrating mastery of both historical content knowledge and historical thinking practices.

## How smart classrooms are expanding the horizons of learning?

This information is then reported by level of education, and typically as a share of national income GDP or as a share of total public expenditure.

## Horizons University

Although the misfortunes of Italy in the 6th century—including the Lombardian invasion—did not permit this hope to be realized, the work of Boethius later nourished the medieval renaissance of philosophic thought. To facilitate control of his empire, Alexander had commenced the process of founding a network of cities or communities organized and administered in the Greek manner. They furthered the scientific breeding of horses and cattle; found new ways of grafting to produce new types of flowers and fruits; introduced new concepts of irrigation, fertilization, and soil cultivation; and improved upon the science of navigation.

## Shrinking the Earth

In this sense, it is equivalent to what social scientists term socialization or enculturation. The Carolingian tradition, however, was not totally forgotten by princes and others in high places. These pressures led to the creation of a new type of school, the madrasa, which became the crown and glory of medieval Muslim education.

## Daniel's ever

The curriculum in the madrasa comprised Ḥadīth the study of Muslim traditions, jurisprudence, literature, logic and philosophy, and prosody. Basil also tolerated the use of the secular schools by Christians, maintaining that literary and rhetorical culture is valuable so long as it is kept subservient to the Christian life.

## As World's Population Booms, Will Its Resources Be Enough for Us?

In the Carthusian monastery, the four steps of required spiritual exercise were reading, meditation, prayer, and contemplation. Organization of education The system of education in the Muslim world was unintegrated and undifferentiated.

### **Shrinking the Earth**

Nearly half of those in New York City where fire still smolder in Queens, and there are reports of looting in Brooklyn and Long Island. The purpose of primitive education is thus to guide children to becoming good members of their tribe or band.

### **The fastest**

The Mycenaean civilization consisted of little monarchies of an Oriental type with an administration operated by a bureaucracy, and it seems to have operated an educational system designed for the training of scribes similar to those of the ancient civilizations of the Middle East. Oral instruction and teaching by example were the chief methods of education. Its paramount purpose was to develop a sense of moral sensitivity and duty toward people and the state.
