Flora of The Potrero, Anza

The difference, again, is that the December rain wasn't quite enough to germinate the annuals here this year, and the January rain came too late to germinate many annuals. Matthews was coordinating plant removals under a California Invasive Plant Council grant. I will definitely be hitting this up in the future.

Anza Borrego Desert Botany Society

The hike is also self-guided with a map explaining 20-odd special features that are marked along the way you can pick up the map at the visitor center. Whether you visit for a few hours or a few days, the namesake giant yucca plants and jumbled rock formations offer an otherworldly view, like faithful sentinels guarding decaying castles. Because the locations change, the numbers of species in bloom, and the number of plants in bloom, cannot usually be directly compared from trip to trip.

Anza Borrego Desert Botany Society

It is a lowland surrounded by high mountains, which block most of the rainfall. Maybe so, but in the area of San Felipe Creek, I think the teddy bear cholla is the most common perennial.

Cactus Loop Trail

The Botany Study Group will also suspend activities as well. Not common, but this was the only terrestrial mammal I saw in the desert besides humans and coyotes.

Best Hiking Trails in Anza

An excellent place to look for bighorn sheep is along the , at the western edge of Borrego Springs.

Hiking with Chuck

See how many you can find: yellowish-green flowers on barrel cactus; deep pink on hedgehog and beavertail; and off-white flowers with yellow centers on fishhook cactus. The locations for each hike are in the detailed reports below; more information is sometimes given in , which usually includes more information about the bloom on each trip.
