Nuculid bivalves of the genus Acila

Acila Truncacila from the Campanian Yasukawa seep site on Hokkaido, Japan. This specimen was found ex pisco.

Nuculid bivalves of the genus Acila

The number of burrowing bivalve species with oblique ribs generally rose towards the end of the Triassic, which probably reflects increasing competition at a time when most niches were re-occupied after the end-Permian mass extinction event.

Preface

Adams, 1857, without knowledge of internal features like hinge dentition and muscle attachment scars.

Bivalves

Kazushige Tanabe The University of Tokyo , a specialist on ammonoids from Hokkaido, who also brought our attention to several cold seep deposits there.
