

Particles in astrophysics and cosmology - from theory to observation : proceedings of an International Workshop on Particles in Astrophysics and Cosmology : from theory to observation : València, Spain, 3-8 May 1999

North-Holland - Particles in astrophysics and cosmology : from theory to observation : proceedings of an International Workshop on Particles in Astrophysics and Cosmology: From Theory to Observation : València, Spain, 3

Description: -

-
Cosmology -- Congresses.
Particles (Nuclear physics) -- Congresses.
Nuclear astrophysics -- Congresses. Particles in astrophysics and cosmology - from theory to observation : proceedings of an International Workshop on Particles in Astrophysics and Cosmology : from theory to observation : València, Spain, 3-8 May 1999
-
Nuclear physics -- vol. 81.
Proceedings, supplements, Nuclear physics B -- 81. Particles in astrophysics and cosmology - from theory to observation : proceedings of an International Workshop on Particles in Astrophysics and Cosmology : from theory to observation : València, Spain, 3-8 May 1999
Notes: Includes bibliographical references and index.
This edition was published in 2000

Particles in astrophysics and cosmology: from theory to observation: proceedings of an International...

In: Proceedings of the Adriatic Meeting, Rovinj 1973, ed.

Particles in astrophysics and cosmology : from theory to observation : proceedings of an International Workshop on Particles in Astrophysics and Cosmology, from theory to observation, València, Spain, 3

Published for the Committee on Space Research by Pergamon Press, 2000. A comparison with other proxies, such as the PVI, is performed.

ASCA Conference proceedings

Large Alfvén speed is found to be a requirement for the occurrence of suprathermal proton distribution; further, we find the proportion of particles in the shoulder to be limited by the magnitude of the Alfvén speed. In this study we consider the evolution of initial ion temperature anisotropies and relative drifts in the presence of plasma oscillations, such as ion-cyclotron and kinetic Alfvén waves.

solar wind particles: Topics by Science.gov

We investigate quasi-adiabatic dynamics of charged particles in strong current sheets SCSs in the solar wind, including the heliospheric current sheet HCS , both theoretically and observationally. Zichichi World Scientific, 2014 , pp. This fundamental result will help astronomers relate the appearance of an asteroid to its actual history and identify any after effects of a catastrophic impact with another asteroid.

solar wind particles: Topics by Science.gov

Broad Band X-ray Spectra of Cosmic Sources, Proceedings of the E1. By considering eight possible solar wind and turbulence source configurations, we show that the large-scale solar wind and IMF inhomogeneity and the strength of the turbulence sources significantly affect the distribution of turbulence in the heliosphere within 6 au.

Particles in astrophysics and cosmology: From theory to observation

Particles in astrophysics and cosmology: from theory to observation: proceedings of an International...

The distinct difference in MVA results inside and outside PBSs remains unexplained.

Particles in astrophysics and cosmology : from theory to observation : proceedings of an International Workshop on Particles in Astrophysics and Cosmology: From Theory to Observation : València, Spain, 3

New Horizon of X-Ray Astronomy. In order to understand the small-scale plasma processes occurring in the solar wind, the global and local properties of such energy distribution must be known. The Solar Wind Around Pluto SWAP instrument revealed an interaction region confined sunward of Pluto to within about 6 Pluto radii.
