Dr. (MD) Marcin Hanczaruk, The Alliance for Innovation Foundation, Poland

Polish twin ENEA working group on adaptation and working group on EIA: forums coordinated by the Ministry of the Environment, play role as a communication channel between regional stakeholders and central government regarding climate change. Moreover, there are enterprises that reach out to researchers by establishing foundations, sponsoring grants and internships. As part of the project CLIMCITIES, a group of experts from the Institute of Environmental Protection - National Research Centre IEP-NRC, Norwegian Partner Vista Analyse and other cooperating institutions, have developed urban adaptation plans for five cities, selected in the project framework.

Poland: National Reading Development Programme 2.0

To this end, Poland will take part in work on establishing under the new mandate for ENISA, including responsibility for the European Cybersecurity Certification Framework Reference: Regulation EU No. The goal of this company is to save human lives during search operations with the use of their technology.

National Professional Development Center on Autism Spectrum Disorder

These guidelines may also be used by any interested local government. More information: Source: Eurydice Unit Poland. The Chief Commandant of the State Fire Service also acts as the Chief of the National Civil Defense.

Research & Development

The overarching goal is to enable Polish producers to compete more effectively in the Digital Single Market. According to the Minister of Science and Higher Education internationalisation of Polish science is a key challenge to be faced in the following years. FNP established in 1991 as an independent, self-financing, non-profit, non-governmental organization.

RESEARCH IN POLAND

Poland participates in the following multilateral disaster coordination systems: the European Union EU, the North Atlantic Treaty Organization NATO, and the United Nations UN. The analysis was made on the basis of the SRES A1B scenario, seven regional models and boundary

conditions from four global models for the period from 2070-2100 with intermediate thresholds at 2030 and 2050.

Research in Poland

Klimada is also collecting data about case studies in some regions in Poland.

Research & Development

It plays an important role in the evaluation process of scientific institutions — participation in international projects as well as international recognition of scientific publications is highly rated in this evaluation. Flood hazard and flood risk maps are available online.
