### Restarting your maxTV set

AirPlay is certainly the easiest and most elegant solution, but you can get wireless capabilities out of a handful of Blu-ray players and set-top boxes as well. I had suspected that there are some configuration changes that would allow the AIRPORT EXPRESS to work thru the ethernet ports, and I came across this amazing tutorial on how to do this not my particular equipment but if you read thru this tutorial it makes a lot of sense. We're already used to TV talent shows where people phone in to vote for their favorite acts, but in a future where TV programs are delivered online, we can expect far greater involvement in the programs we watch.

### Should I Get a Set

How far back you can rewind will depend on the particular box.

### Should I Get a Set

However, I read somewhere that using DMZ in this scenario is not an issue. I see the green light. But if you don't want yet another box and remote in your home theater, or another HDMI port monopolized on your TV, you can combine set-top features with another device for maximum efficiency.

### Digital Set

I have found lots of posts on how to restart it, but that won't do the trick.

### Troubleshooting

All stream Netflix, one or two more video services, and a music station or two.

## **How to Add Internet Access to a Standard Television**

They allow us to count visits and traffic sources so that we can measure and improve the performance of our sites. With a service such as Netflix an online movie website , you select a TV program or movie you want to watch from a wide range, pay your money, and watch it there and then.
