**Yuen, Andrew Chi**

The concern of business owners and managers all over the world is to devise a strategy which will help in maintaining liquidity as well as to increase profitability and shareholder's wealth. .

## Aviation Infrastructure Performance. A Study in Comparative Political Economy

Among the countries studied, the United States is sometimes seen as a bastion of free markets, at the forefront of airline deregulation, but its airports and air traffic control system are publicly owned and operated. The air transport sector supports Gross Domestic Product and the employment of Nigerians through four different routes: direct route, indirect route, induced route and catalytic route. The airport industry has shifted from public to private sector ownership over the last twenty years as a result of new policy directions initiated by the desire of the 1980s conservative government to privatize public utilities.

## Aviation Infrastructure Performance: A Study in Comparative Political Economy

Different regulations and funding sources govern the operations of these services. A Study in Comparative Political Economy Congestion at airports and airline travel delays have become a major concern for the traveling public and attracted the attention of policymakers in a number of countries, including America's president and Congress.

## Aviation Infrastructure Performance: A Study in Comparative Political Economy

Generally, the largest improvements in economic welfare from privatization of public facilities are likely to be generated in environments where privatized entities are subject to intense competition that leads to lower costs and more rapid technological advance. .
