Anoxygenic photosynthesis also appeared to contribute to primary production in several lakes. All chapters are updated to the latest research level.

Microbial Diversity and Ecology of Alkaline Environments

Kemosynteesiin perustuva elämä on saattanut edeltää fotosynteesiin perustuvaa elämää maapallolla.

Hóa tổng hợp

Kemosynteesissä ei siis fotosynteesistä poiketen tarvita energianlähteenä auringon valoa, vaan energia saadaan hapettamalla epäorgaanisia yhdisteitä. Life in the "Plastisphere": Microbial Communities on Plastic Marine Debris

Ammonia-oxidizing archaea AOA from Marine Group I Thaumarchaeota were found in high abundance in lakes Shalla and Beseka, constituting as much as half of the RNA-derived reads at 13 m depth in Beseka while also abundant at the surface.
