2030 climate & energy framework

In particular, the EU has taken the lead in the fight against climate change and the promotion of a low-carbon economy.

Climate Change Partnerships

For related information see the.

Local Energy Action: EU Good Practices: Directorate

The renewed EU SDS set out a single, coherent strategy on how the EU will more effectively live up to its long-standing commitment to meet the challenges of sustainable development.

2030 climate & energy framework

Focused on state-to-state cooperation, Alliance members are committed to the acceleration and deployment of climate solutions needed to help each state achieve their climate goals. Climate Alliance committed to standing together to combat climate change and support clean growth across North America.

Local Energy Action: EU Good Practices: Directorate

The sensors will be used to enhance PM monitoring in the municipality, facilitate exchange of information related to air quality in the region, and enhance the capacity of municipal authorities to enforce regulations to limit activities known to adversely impact air quality.

Local Energy Action: EU Good Practices: Directorate

Within the MOU each signatory pledges to work together to preserve the natural biodiversity and health of forests, to share best practices on forest management, preservation, and conservation, and to engage in scientific study, adaptive practice, improved data and modeling, and indigenous traditional knowledge within their respective jurisdictions in an effort to better understand forest carbon dynamics and response to climate changes.

Climate Change Partnerships

The Bornholm FLAG recognised that renewable energy offered an extraordinary economic opportunity for the local community, and that local cooperation is the best way to achieve the necessary change. Given the significance of agriculture to both Mexico and California, the participants agree to promote cooperation and exchange of information on climate change adaptation for farmers and ranchers; to cooperate on food safety issues; plant and animal health; cross-border inspections; transportation logistics and trade issues; and to promote cooperation in agricultural workforce development. The key areas of engagement include climate change policy, reduced deforestation, zero-emission transportation, and climate-friendly energy systems.
