An Englishwoman in Utah : the story of a life's experience in Mormonism : Stenhouse, Fanny, 1829

Adopting a tone of aloof bemusement, she describes in detail the hardships and annoyances of her travels by sea from England to Halifax, and on the road to Boston, Cincinnati, and Chicago. It was written in the 1850s, but offers a glimpse into a time and place. Isabella Bird is a young Englishwoman traveling in the north-eastern United States and Canada in the 1850s.

Did you ever wonder what life was like in America pre-civil war? Her observations are candid and definitely not what we would call politically correct. Their attainment of the American dream has often been married to a vision of economic prosperity. Back to the book, this was also particularly interesting among Isabella's, because it describes the seeds of the modern North American society.

This one, however, was not bad at all, if only a bit boring and way too detailed at times. And yet, the book has value as a personal view of life in North Amer This book reads like a Christmas family update letter from a distant relative. However, it is important to remember the time in which she wrote.

An Englishwoman's experience in America

Immigrants have profoundly and indelibly impacted the political landscape of America. Such mudslingers don't even try to assume the viewpoint of the speaker, who must have some sort of reason in order to voice an unpopular opinion. Isabella Bird was a formidable woman, and an excellent travel writer.

New Beginnings: Immigrant Women and The American Experience

Miss Bird was a brave woman, diving in and ready for her next adventure sharing her wit, wisdom and humor.

New Beginnings: Immigrant Women and The American Experience

There are turns of phrase that I can imagine being spoken with that slight hint of self-assessed cleverness that some people exhibit, when talking about themselves in a breathless manner, looking for the approval that affirms just how marvelous they are. The book is packed with information - every detail of life, traveling, education, industry, medicine, shopping, entertainment, etc.

What is interesting about observers from the past like MissBird and Tocqueville, is that America hasn't changed much.
