Applications of Wireless Communication

Konrad Zuse, a German engineer acting in virtual isolation from developments elsewhere, completed construction in 1941 of the first operational program-controlled calculating.

Classification Of Digital Computer

Of great importance in the evolution of the digital computer was the work of the English mathematician and logician. Many of the microcomputers produced during the 1980s were equipped with a single chip on which circuits for processor, memory, and interface functions were integrated. Circuit pathways in a digital computer can now be printed extremely close together.
