Cabinet Care and Refinishing

It was created at the instigation of Edison dealer Babson Brothers of Chicago. Again, most are potmetal and subject to swelling. When I get extremely frustrated I torch them out by heating the rear of the housing, but I don't recommend this and you didn't read it here.

Repairing an Edison Concert Phonograph

Unlike later models, the bedplate and motor simply sat on a lip in the case without the benefit of mounting screws. The result of this redesign was far reaching in that every Edison cylinder player after the model C would lack an end gate. When starting such a big restoration, I prefer to begin with the most challenging things.

Service, repair or renovate?

Motor Parts 41 Edison Spring Motor 42 Batteries 47 Nickel-in-the-slot Phonographs 55 Dictating and Transcribing 60 Phonograph Cylinder 65 Horns and Tubes 71 Shaving of Cylinders 76 Speakers and Glasses 81 Index of Speaker Parts 83 Record-making 86 ILLUSTRATIONS. CYLINDER REPRODUCERS HAVE EITHER TWO MINUTE OR FOUR MINUTE STYLUS, OR BOTH.

Edison gramophones

On the rear of the arm casting is an enlarged area to accept the Shaver attachment. That crazy contraption plays LOUD with the medium tone needles.

Spotter's Guide to the Edison Standard Phonograph

The machine came without case, dismantled and in a wood crating box. Opening it was like conducting an archaeological dig. The reproducer carrier was initially the angled carrier arm, much like the Model B but with a different half-nut to mesh with the different feedscrew.

Edison Gem Model B Phonograph

By the time of its introduction Oct. Hook the linkage to the diaphragm, if you haven't already done so.

Gem Model B

Discuss as a practical alternative today. Oak case with script Edison in gold across the front.

Edison gramophones

The belt drive pulley is a dished casting. Obviously, many of these machines have been repaired or altered in the last 100+ years, so the data project is more about spotting trends rather than single anomalies. I have used dry cheese cloth to remove the last slight smudges of uncured epoxy from the surrounding area many times before with excellent results.
