and improved staff retention, benefiting the healthcare workplace as whole.

### What Is Professionalism in Nursing?

Some of her research examines the nursing and organizational factors associated with pediatric patient outcomes and the health of the work environment. Nurse Education Today 19: 3, 3-11.

### Leadership, the key to the professionalization of nursing

Encouraging and maintaining a culture of respect, cooperation, honesty, and integrity allows nurses to inspire close-knit team collaboration, unified by the common goal of providing the best possible care for patients. In contrast to transformational leadership, which can be criticised for being very leader focused, resonant leadership is described by Goleman et al 2002 as a type of leadership that invests time and effort into creating good relationships rather than into setting an inspiring vision.

### Holdings: Leadership :

In this case, changing practice would not only enhance quality of care, it would promote trust, confidence and involvement between staff and patients, whereas the risk of not changing practice was the potential clinical risk to patients. London: Royal College of Nursing.

### Leadership, the key to the professionalization of nursing

Working in professional environments can help nurses develop skills that are valuable at any stage of their career, from novice clinical roles to senior leadership positions. Bad habits can creep into even the best of environments especially during times of change so expect that discussions
