In Engineering in Medicine and Biology. Following the new ESPEN Standard Operating Procedures, the previous guidelines to provide best medical nutritional therapy to critically ill patients have been updated.

## Personal Assistive Devices for Elderlies

At first, we provide a classification of the devices required to support the execution of activities of daily living based on the technical application and domains involved. Flexion-extension motion assistance using an upper limb motion-assist robot based on trajectory estimation of reaching movement. These devices aim to allow elderly people to stay more independent at their home and focus on the elderly person as the first user who must experience a benefit from them.
