NCTC

This course is required to be eligible to sit for the Certified Business Economic CBE Exam. The course includes in-class demonstrations, hands-on experiments, and real-world examples. An economic analysis of historical events leading up to and following the Industrial Revolution, large-scale industry, early banking, commerce, Utopian movements, war, postwar economic integration and the continuing debate over economic globalization.

The five fundamental principles of economics, basic terms we need to know in order to move on.

Students will perform an empirical evaluation of project feasibility using cost-benefit tools.

Economics program

Â By assuming that people are rational, and make decisions based on what is best for them, we can break down the decision making process. No credit will be given for previous experience or activities.

The five fundamental principles of economics, basic terms we need to know in order to move on.

The course develops univariate and multivariate methods that allow users to capture patterns in data related to seasonality, trend and other random components to produce forecasts that are useful in virtually any business environment. The course will use a variety of learning methods including

lecture, class discussion, case analysis and presentation, guest speakers, and written exercises.

The five fundamental principles of economics, basic terms we need to know in order to move on.

Economic forces that influence the quality of the environment; economic theory and environmental management; regulatory requirements for economic impact analysis; international issues including trade and implications for Third World economies. It doesn't mean they make the best long term decisions, it just means they make the best decisions according to their own desire for happiness with the information that they have.

Economics

The goal is to develop the skills to write quality papers using a variety of statistical techniques. We have to pay for food, movies, or classes.
