## Print culture

Discussion of the Literature It is difficult to cite previous scholarship on either industrialization or urbanization from precisely the 1880—1930 period because both these trends pre- and post-date this period.

## The History of the Electric Car

The development of more intricate and efficient machines along with techniques after 1910 greatly expanded output and lowered production costs.

## The Century of Capitalism: What the Nineteenth Century Stood For

Technological developments in construction, transportation, and illumination, all connected to industrialization, changed cities forever, most immediately those north of Washington, DC and east of Kansas City. In the early 1800s, Richard Trevithick debuted a steam-powered locomotive, and in 1830 similar locomotives started transporting freight and passengers between the industrial hubs of Manchester and Liverpool. See Sam Bass Warner Jr.
