### How Climate Change is Impacting Maine's Forests

Since so many variables exist, cities and towns have taken a wide variety of approaches. A random sample of 1,000 to 1,500 potential nature-based tourists will be purchased and surveyed by mail using the Dillman Tailored Design Method. Slogans and marketing themes are meaningless unless the entire community buys into them.

### Logging adds over \$600M to Maine economy, but the industry can't find workers

Preliminary results of a survey conducted in year 2002 on increasing biodiversity conservation in forests in Southern Finland indicate much more positive attitudes towards nature conservation Lehtonen et al. Reallocating land from timber production to nature conservation has been a prominent trend in northern Europe and North America during recent decades.

### Maine's outdoor recreation economy involves 4.7% of state employment

Wolf Neck Woods State Park, Freeport. If this is the case, it also suggests that it may be difficult to attract certain types of nature-based tourism to the region.

### A COMPARISON OF THE ECONOMIC RENT AND CONSUMER SURPLUS METHODS OF VALUING RECREATION BOATING SITES

The largest two age cohorts were those aged 36- 45 and 46- 55.

### Cumberland County Nature Preserves

This information will allow state and local governments to focus their economic development and marketing efforts on those people who are interested in the recreational activities that are best suited to a working forest environment.

## **Economic Valuation of Environmental Values of the Landscape Development and Protection Area of Volcji Potok**

In that sense, the economic arguments used against protecting wildlands are factually and conceptually flat out wrong. The NCRT is clearly recognized by residents as an asset for the region, especially the local community. While walking and jogging are significant uses 20% , they are probably restricted to relatively short sections of the trail near trailheads while bicycle use extends over much longer sections.
