The Unexplored Power of Microbes

Water and air aboard the station are filtered, and microbe levels including on surfaces are regularly sampled and monitored.

What is Microbiology?

The responsible for many are microbes and as such are the target of. Up to 10 billion bacterial cells inhabit each gram of soil in and around plant roots, a region known as the.

The Unexplored Power of Microbes

. The microbial ecosystems on the are no different. Bacteria are the smallest and most hardy microbe in the soil and can survive under harsh conditions like tillage.

Microbes

We regularly wash and bathe - knowing that these rituals help keep us healthy and prevent illness from spreading. Excellent, efficient and professional service including the personal touch which made the whole experience much easier from start to finish.
