The nerve cells of people who practice a lot are also altered. Because practice can positively influence structures in the brain. It is also an important world language.

## 50languages English US

They were able to show that our brain remains agile for a lifetime. Therefore it is important to stimulate the whole brain as often as possible. Of course, a special talent for languages is usually hereditary.

### Desamunu Preminchumanna

Nevertheless, intensive exercise can change certain brain structures.

### Desamunu Preminchumanna

But it is apparently possible to exercise one's brain too.

16364754

This means that our vocabulary gets larger.

Learning changes the brain Those who work out often sculpt their bodies. The language spoken there exhibits a few peculiarities and is considered its own form.

16364754

It is just as important to practice regularly. On 1 microfilm reel with other items ; 35 mm. Series SAMP early 20th-century Indian books project ;, item 49005.

**16364754**

SAMP early 20th-century Indian books project ; item 49005 Master microform held by: ICRL. But when the brain is exercised it processes inputs much better. Reading is also very good practice.
