The squadron flies the Lockheed CC-130H Hercules and the Bell CH-14 Griffon helicopter. Today the squadron's approximately 50 military personnel and 26 civilian employees operate three AugustaWestland CH-149 Cormorant helicopters. Commenting on their coordination with ground units, Air Service trainers remarked: Liaison between the Air and the Ground is very poor with new divisions, as these men have not understood the full value of the airplane.

Training began so quickly that of the 193 observers who graduated from the Second Aviation Instruction Center at Tours in September 1918, the majority had come from the artillery. If the Air Service hoped to become a truly effective battlefield asset its efforts to improve liaison between air and ground units had to reach down the chain of command to the level of the individual air squadrons and artillery batteries. By the end of 1916 so many crews were taking advantage of the opportunity that confusion developed between neighboring batteries.

Hanna had advised Roosevelt for a few months after the assassination, but then lost influence in the administration. Following the successful Soviet detonation of an atomic device in September 1949, the United States accelerated its program to develop the next stage in atomic weaponry, a thermonuclear bomb.
