## **‘Caveat emptor’: the cautionary tale of endocarditis and the potential pitfalls of clinical coding data—an electronic health records study**

This includes information on the volumes and surgical techniques in relation to procedures submitted to the NJR, with the most recent data being for the period 1 January 2016 to 31 December 2016. There is a real opportunity to capitalise on STPs and ICSs to help the NHS forge new partnerships across a place and develop shared approaches and anchor strategies as part of broader system plans.

### **Heart: Myocardial Ischaemia National Audit Project (MINAP)**

All probabilities, costs and utility values applied in the model, along with respective standard deviations and data sources where relevant, are reported in Table. For example, the revision rate for total hip replacement increases at a faster rate over time for younger patients.

### **Myocardial Ischaemia National Audit Project (MINAP)**

In mainstream medicine, early stage medulloblastoma is regarded as a treatable disease. Existing regulations helped gain senior backing for the approach, as trusts are already required by the Department of Health and Social Care to have a food and drink strategy that supports procuring more food from local, sustainable sources. What is important is that you choose a method that you think will best help you create the most useful clinical audit report for your clinical audit activity.

### **Justification in clinical radiological practice: a survey among staff of five London hospitals**

A growing number of NHS organisations are collaborating with local schools and community organisations to expose more young people to careers in the NHS, raise the profile of different types of NHS jobs and help support skills development locally. Since the therapy is administered by the patients themselves, their hometown physicians are often reduced to the role of authorizing blood draws and other routine care.

### **Justification in clinical radiological practice: a survey among staff of five London hospitals**

In 2017, the health and social care system used 27. Lessons from 12 emerging procedures 2006—10. Importantly, the intervention did not involve the employment of additional nursing staff within the RACF.
