Plant & Animal Adaptations in Temperate Forests

Orchids: Peru has a large variety of orchids, some restricted to their natural regions. They are , including insects such as crickets.

Forest adaptation strategies aimed at climate change: Assessing the performance of future climate

The Minnesota Department of Natural Resources MN DNR and The Nature Conservancy in Minnesota have initiated a collaborative project for reforesting thousands of acres in the North Shore Highlands of Lake Superior in Northeast Minnesota. Site A is a high visitor use area; site B is a natural area less impacted by park visitors map courtesy of Samuel Reed.

Adaptability of selected tree species planted in Hawaii forests

Brachiopoda, also known as lamp shells, live in the ocean in very cold water. They also act like gills, usually in marine environments, though also sometimes freshwater and terrestrial. Adults live in the digestive tracts of vertebrates like fish.
