Camille Pissarro: 50 Famous Paintings Analysis

His parents, Frederic Pissarro and Rachel Petit, owned a modest general hardware business and encouraged their four sons to pursue the family trade. In doing so, they visually embed his peasant figures harmoniously into the landscapes to which they belong and which belong to them, communicating a symbolic link to their terrain largely absent from Impressionist painting. The purple hills that extend from the left middle frame downward toward the ocean act as a dividing line in the background, demonstrating Pissarro's ability to merge the local color of the Caribbean with the gentle color palette of the Barbizon School, the group of French painters who first stressed the necessity of painting landscapes outdoors.

Camille Pissarro Biography

The more smoothly distributed paint of the sky and the snow-covered ground demonstrate Pissarro's transformation of Realist naturalism into what would become the experimental, rough Impressionist aesthetic. One of the most appreciated of these paintings is a view of St Bartholomew's Church at the end of Lawrie Park Avenue, commonly known as The Avenue, Sydenham, in the collection of the London National Gallery.

Camille Pissarro Biography
