associated with the cleanup program remained a challenge.

Uranium Mining Life

The purpose of this paper is to document the initial challenges facing the project team during its development of the Long Term Stewardship plan for the management of these soils.

Director Melendez's Opening Remarks to the 2018 Long

This alternative would enable DOE and Mallinckrodt to coordinate efforts to prevent the uncontrolled relocation of contamination and ensure that

Social licensing and Stakeholder Communication in Uranium Exploration and Mining

This required EM to build a new nuclear cleanup infrastructure, assemble and train a technically specialized workforce, and develop the technologies and tools required to safely decontaminate, disassemble, stabilize, disposition, and remediate unique radiation hazards. During that time, EM formulated multi-year cleanup and closure plans, which contributed to cleanup progress; however, reducing the overall environmental risk

ultimate site cleanup objectives are not complicated by plant activities implemented by Mallinckrodt.

Environmental Liabilities: DOE Needs to Better Plan for Post

LM uses a wide range of ICs as part of efforts to appropriately limit access to, or uses of, land, facilities and other real and personal property assets; protect the environment; maintain the physical safety and security of DOE facilities; and prevent or limit inadvertent human and environmental exposure to residual contaminants and other hazards. Additionally, summary data for typical personnel radiation exposure monitoring results are presented. GEMS is continuing to undergo improvements with our stakeholders in mind.

REFERENCES

These goals embody more than 20 years of dialogue among the Tri-Party Agencies, Tribal Nations, State of Oregon, stakeholders, and the public. As such, the long-term maintenance responsibilities at the BONUS reactor facility were formerly documented in the 2010 Letter of Agreement between LM and PREPA to reaffirm the joint commitment of long-term protectiveness. LM is taking some actions to address these challenges.
