Most are written with upper level undergraduate and graduate students in economics and political science in mind, but many are completely accessible to non-expert readers who are interested in Public Choice research.

Oxford Handbook Of Organizational Decision Making

Friedman maintained that economic theory does not have to describe firms' actual behaviors as long as it helps economists to analyze firms' behaviors. Decision makers have neither full information nor the competence and capacities to process the myriad of information that is available, nor do they have perfect knowledge of the issues at hand. In-depth case studies illustrate the practical implications of the work surveyed.

Purposive Behavior in Animals and Men. Adaptive Decision Makers Gigerenzer and colleagues Gigerenzer ; Gigerenzer and Goldstein have criticized BDT as an incomplete portrayal of human cognitive abilities in that it pays insufficient attention to humans' adaptive capacities. The authors offer suggestions for how designers of these events could engineer them to improve the chances of attaining the required transfer.
