The Geology of South Australia: The Phanerozoic

Initial formations of the region occurred in the Cambrian era, over 485 million years ago. Department of Planning, Transport and Infrastructure, issuing body.

Online Mapping

Moho geometry gravity inversion experiment MoGGIE : A refined model of the Australian Moho, and its tectonic and isostatic implications.

Geology of South Australia

The Department for Energy and Mining acknowledges Aboriginal people as the First Nations Peoples of South Australia. Top: Bulli Coal Measures and the Permian Triassic Extinction Event Boundary Triassic 248-213 million years ago. Great Barrier Reef Climate Change Action Plan 2007—2011.

Geology of the Illawarra and Southern Highlands

Along the eastern Gondwana margin there was a volcanic arc that extended 1800 km from south of Sydney to Northern Queensland, this would indicate a more active tectonic region. Lake Eyre Basin gained its endorheic status roughly one million years ago as the salt lakes within its area began blocking water outflows to rivers. I have pieced together from different sources a basic geological outline of what I think possibly occurred and offered some of my own observations.
